

NORDIC FIBERGLASS, INC.
Quality Products for the Electrical Industry

Nordic Fiberglass, Inc.

Scholarship Endowment

At Nordic Fiberglass, support is literally from the ground up. Myron and Army Haugen arrived in Devils Lake in 1968 from Dassel, Minnesota, when Myron's employer asked him to manage a Devils Lake business. In 1970, Nordic Fiberglass, Inc. began operations and has been manufacturing quality products for the underground electrical industry ever since. In 1985, an additional office opened in Warren, Minnesota.

Nordic Fiberglass makes box pads, sectionalizing cabinets, flexi-flags, ground sleeves, hill holders, and pedestals. The company's years of experience and commitment to excellence have earned it a reputation as the "go-to" company when products are needed for underground electrical distribution.

Since Nordic Fiberglass had a history of being an integral part of the Devils Lake economy, founders Myron and Army Haugen wanted to give back to the community. Myron heard of the need for toolboxes in Lake Region State College's Automotive and Diesel Technology programs, so he and Army decided to act and established an endowment to assist students in those fields of study.

"We saw there was a need for toolboxes, and we wanted to provide some extra help," Myron says with a smile.

At Nordic Fiberglass, Inc. the goal is to provide courteous, expedient, professional service of the highest caliber—similar to the goals of LRSC staff towards students.

This gift from Nordic Fiberglass will honor and assist Automotive Technology students with similar goals. ♦
